Assessment Activity: Restaurant Site 1

In this assessment, you will use HTML to create a small three-page website for a restaurant. You are required to implement the site according to the wireframes found below.

Requirements

1. The site and pages must be laid out to match the wireframes below.
(**Note: The elements do not need to be centered but there does need to be a logical and cohesive arrangement of the required information in each wireframe on your pages.**)
2. You must create a name for the restaurant.
3. You must supply a fictional address and phone number for the restaurant.
4. You must supply a picture for the restaurant home page.
5. You must supply a description of the restaurant.
6. Hyperlinks in the navigation bar must work correctly to open the appropriate pages in the website in the current window.
7. You must include an external link to a restaurant review. While the home page should present this as a review of this restaurant, you may choose a review for any restaurant you wish. The link should open the review in a new page or tab.
8. All fields in the form should work to collect the expected information, although the Submit button will not work to submit the data.

Note

The bubble callout in the Contact Us wireframe will not appear in the page - it is there just to specify the items that should be included in the drop-down box.

Check Your Work

Use the list below to make sure you included all the required components in your website.

- Home page: Restaurant Information
 - The home page includes the name of the restaurant, the restaurant's address and phone number, and a picture that represents the restaurant.
- Home page: Page Layout
 - The page layout reasonably matches the provided wireframe, including the appropriate tab name, main heading, navigation pane, image, description, and footer.
- Home page: Picture
 - The home page includes an appropriate photo of a restaurant and the image is sized and positioned correctly on the page.
- Menu Page: Page Contents
 - The menu page includes a tab name, the restaurant name, and at least six food items, including a name, description, and price for each item.
- Menu Page: Layout
 - The layout of the menu page reasonably matches the layout shown in the wireframe.
- Contact Us Page: Layout
 - The layout of the Contact Us page reasonably matches the layout shown in the wireframe.
- Contact Us Page: Form Elements
 - Each of the form elements is defined correctly, including the drop-down list and the button.
- Hyperlinks
 - Hyperlinks work as expected. Internal hyperlinks should open in the current window and external hyperlinks should
